EPSC

Contractor Certification Course

2012

Course Description

This one day course is for contractors, developers and home builders who will be overseeing or be directly responsible for any land clearing, construction, or development activities involving the movement of earth.

As of April 1, 2006 an EPSC Certified Contractor will be required for all land clearing activities. This course is designed to provide those individuals with the knowledge and skills to comply with local, state, and federal regulations regarding erosion prevention and sediment control practices.

The course will provide information regarding the NPDES Phase II Storm Water ordinance, the responsibilities of a certified contractor regarding Erosion Prevention and Sediment Control; the city's permitting processes and an overview of the city's Storm Water Manual. Following the course presentation, a short test will be administered. A passing grade of 70 will be required to obtain certification.

In addition, the course will describe the recertification process that is required every three years.

Course Outline

- Welcome
- Need for certification program
- Responsibilities of certified contractors
- Development requiring a certified contractor
- Initial certification
- Recertification, reciprocity
- Coordination with KPDES permitting requirements
- EPSC tools
- BMP Maintenance and Inspection
- Erosion Prevention Practices (EPP)
- Sediment Management Practices (SMP)
- Good Housekeeping Practices (GHP)
- Implementation timeline
- ADA requirements within right-of-way
- Bowling Green permitting process
- Lunch (provided)
- Test

Course Instructor

Matthew Powell
City of Bowling Green
Public Works Inspector

Mr. Powell has experience at both the State and Municipal levels in Erosion and Sediment Control Regulations and Inspections. He has worked in the development of erosion control training as well as the development of EPSC Permits. Currently he is responsible for the construction and post construction components of the City's Storm Water Program, including plan review and site inspection. Powell is a Certified Professional in Erosion and Sediment Control, a Certified Professional in Storm Water Quality and a qualified Kentucky Erosion Prevention and Sediment Control Inspector.
