

	Bowling Green, Kentucky Stormwater Best Management Practices (BMPs) Good Housekeeping Practices (GHPs)	GHP-02	
Activity: Paving Operations (PO)			
PLANNING CONSIDERATIONS: Training: None Inspection Frequency: Daily Implementation Cost: Low Monthly Maintenance: Low			
	Target Pollutants		
	Significant ♦	Partial ◇	Low or Unknown ◇
	Sediment ◇	Heavy Metals ◇	Nutrients ◇
	Oil & Grease ◇	Bacteria & Viruses ◇	Oxygen Demanding Substances ◇
		Toxic Materials ◇	
		Floatable Materials ◇	Construction Waste ◇
Description	<p>Paving operations have the potential to introduce a large amount of pollutants into the environment. This BMP will reduce or prevent the discharge of pollutants by using measures to prevent run-on and runoff pollution along with proper disposal of waste, and proper training of employees and subcontractors.</p>		
Approach	<ul style="list-style-type: none"> ➤ Do not pave during wet weather. ➤ Store paving materials away from water courses to prevent stormwater run-off. ➤ Protect water courses, particularly in areas with a grade, by implementing BMPs to divert runoff or trap/filter sediment (see SMP-05, -06, -10, -12). ➤ Leaks and spills can contain toxic levels of heavy metals and oil and grease generated from paving equipment. To alleviate these pollutants into the area, place drip pans or absorbent materials under paving equipment when they are not being used. When spills do occur, clean up spills with absorbent materials (see GHP-05). ➤ Cover catch basins and manholes when applying seal coat, tack coat, slurry seal or fog seal. ➤ Most commercial covers will magnetically seal flat catch basins and inlets. ➤ If paving involves Portland cement concrete, see GHP-09, Concrete Waste Management ➤ If paving involves asphalt concrete do the following: <ol style="list-style-type: none"> 1. Keep sand or gravel placed over new asphalt from being washed into storm drains, streets or creeks by sweeping. Refer to GHP-06, Solid Waste management for proper disposal. 2. Old asphalt must be disposed of properly. Collect and remove all broken asphalt from the site and recycle. 3. If paving involves on-site mixing plant, follow the stormwater permitting requirements for Industrial activities.

| Maintenance | <ul style="list-style-type: none">➤ Maintain inlet protection so that water is not allowed to back up onto areas subject to traffic. Alternative measures should be employed if back up occurs.➤ When sediment reaches storage capacity inlets need to be cleaned and repair as needed.➤ Keep ample supplies of drip pans or absorbent materials on-site. |
| Inspection Checklist | <ul style="list-style-type: none"><input type="checkbox"/> Machinery is not leaking and properly maintained.<input type="checkbox"/> Inspect employees and subcontractors to ensure that measures are being followed. |
