1. Number of locations within tornado path approved for rebate:

1.

2. Number of location within Bowling Green City limits:

2.

3. Calculated percentage of rebate

3.

4. Occupational fees paid on Net Profit Return line 15:

4.

5. Rebate amount:

5.

Divide the number of locations affected (line 1) by the total number of locations with the City limits (line 2).

Resulting percentage in (line 3).

Put the amount of occupational fees paid on the net profit return from line 15 and place on (line 4).

Multiply (line 4) paid fees by (line 3) calculated rebate percentage and place the resulting rebate on (line 5).

SAMPLE CALCULATION FOR TORNADO REBATE APPORTIONMENT

Example:

1. Number of locations within tornado path approved for rebate: 3

2. Number of locations within Bowling Green City limits: 5

3 locations (line 1) divided by 5 locations (line 2) =60% (line 3). For the rebate 60% of the net profit paid for the year will be eligible for the Tornado Relief rebate.

If business paid \$1,000.00 in occupational fees (line 4) on the net profit return the refund amount will be \$600.00 (line 5).
